

Federal Mogul Powertrain Otomotiv A.Ş. will provide safe and healthful workplaces and will protect the environment insofar as it is affected by our activities, products or services. We will:

- Meet or exceed applicable environmental, health and safety (EH&S) requirements imposed by law and any EH&S standards or procedures which the company adopts.
- Manage EH&S in accordance with ISO 14001 & ISO 45001, and continually improve the EH&S management system and overall EH&S performance in pursuit of the company's goal of zero defects in all that we do.
- Develop and implement best practices for worker and environmental protection, including practices to prevent pollution and minimise waste.
- Inform all employees of this policy and provide the training and resources necessary to implement it.
- Develop and implement appropriate EH&S objectives and targets as part of our various business plans.
- Employ appropriate EH&S performance measures and recognise exemplary accomplishments.
- Conduct periodic self-evaluations and audits of EH&S compliance and of EH&S management systems, -the results of which will be considered during periodic management reviews of the adequacy of such systems.
- Identify potentially applicable improved EH&S management practices, through benchmarking and participation in appropriate cooperative programs to develop such improvements.
- Identify, consider and minimise -in research and development, acquisition, and capital project review and approval activities -- potential EH&S impacts of new and modified products and production processes.
- Consider EH&S performance in the selection of suppliers and contractors and work cooperatively with them so that they will support Federal-Mogul's adherence to this policy.
- Work constructively with government regulators and concerned citizens on EH&S issues
- Make this policy available to the public.

It is the responsibility of our line managers to provide the leadership and resources needed to meet this policy.
